 **Address :** Cluj-Napoca (Romania)

WORK EXPERIENCE

QA Tester

Gameloft Romania SRL [04/04/2017 – 24/05/2018]

Address: Cluj-Napoca (Romania)

- The spotting of bugs in the AUT (Application Under Test) followed by thorough analysis and detailed submission.
- The creation of test cases in order to maximise the efficiency and to contribute to a lower level of difficulty for the junior testers or fellow colleagues. The procedures were designed taking in consideration the requirements imposed by the iOS checklist, with some exceptions depending on the nature of the task (i.e gameplay related tasks).
- The configuration of multiple elements related to the CRM (Customer Relationship Management) part of the application. Some of these elements include: the creation of campaigns related to in-App Purchases, geolocation related settings and filtering of the sections reachable by the user depending on the parameters that were provided by the dev team (i.e. age, sex, playing habits, nationality etc). For this particular task, the internal tool used was called CROM.
- Setting up a diverse range of events, more exactly Time Limited Events (TLE) with the purpose of providing the users with unique experiences depending on the occasion (i.e Christmas events or all sorts of holiday/non-holiday related events) . This task was facilitated with the help of a tool called SEM
- The creation of Advertising related campaigns and the customization of the Ads in another internal tool, depending if the ads were third party ones or not.
- On rare occasions when my superiors (on the CRM task) were absent I had the opportunity to give out tasks, coordinate and train a small group of people with different nationalities, for example from Bulgaria, Ukraine or sometimes Vietnam, when we had to help out and share tips with the Android focused team. Our entire department was focused on iOS devices in particular and made sure that the applications we tested were up to par with the iOS technical checklist.

Data Analyst

Gruppo Mol Finprom SRL [01/08/2019 – 02/12/2019]

Address: Oradea (Romania)

- The company does outsourcing services for 20 Italian banks and multiple assurance companies
- Data entry for further classification and gestion for banking related activities.
- Classification of the documents received by the firm from financial agents or banks.
- Requesting documents or forms through e-mails or other mediums for further advancement of the debt processing.

QA Tester

Quantic Lab [25/05/2020 – Current]

City: Cluj Napoca

Country: Romania

- Functionality testing on the following platforms : iOS, Android, PC, PS4.
- Compatibility testing on mobile devices.
- Regression testing.
- Creation of test cases for various sections of the application, depending on the client's requests.
- Performance testing, mainly using a 3rd party software which indicates the FPS values, the amount of CPU, GPU and Battery usage.
